

SSI releases 4 advanced features on Web – Mobile – Pro Trading

Hanoi, 05/10/2015 - From today, customers trading via SSI online systems Web Trading, Mobile Trading and Pro Trading, can use 4 new features which support to minimize actions and to save time:

- **Change Order:** with this function, customers promptly adjust orders instead of canceling old orders and placing a new one.
- **Cancel Multiple Orders:** when customers want to change investment decisions, rather than canceling each order as before, they can select multiple orders or all orders to cancel at once.
- **Pre-Market Order:** customers easily place orders for the next day after 4p.m. of the current trading day. The operating steps are similar to order during trading transaction. This new feature, which is designed to steps of placing order in trading hours, will be suitable to busy investors who do not have much time to follow the market.
- **Quick Status:** after successfully placing orders on trading systems, customers can immediately see orders' status on Buy/Sell screen.

Advance functions related to Place Order – Cancel Order – Change Order are efforts of SSI to remove space and time barriers between investors and stock market. Recently, continuously launching new features such as 'Japanese Interface' and 'UPCOM Order Placing', Securities Services of SSI has made significant steps to strengthen its leading position in Vietnam Stock Market. We provide innovative and efficient solutions for investors.

Also in 2015, Securities Services has received prestigious awards such as "Best Broker" in Vietnam by FinanceAsia or "Best Institutional Broker" in Vietnam by Alpha Southeast Asia.
