

On July 15<sup>th</sup> 2013, SSI will officially launch the new Stock Board at all locations of SSI and on the Website at the following address: <http://banggia2.ssi.com.vn/>.

The new version of Stock Board has developed based on the new technology platform to bring the utility to investors, which target to usability, speed, stability, accuracy and ease of using to all investors. The outstanding features of the new Stock Board include:

- Supporting multiple browsers, works best on Chrome, FireFox.
- Using new technologies mechanism to push data.
- Data updated in real-time (real-time);
- Integrated analysis of individual information stocks;
- Many options in preferences of each investor (column display, color, roll, slide, showing how: Double-click to bring up the code ...)
- Demonstrating information transactions.
- Stock Board for HNX, HOSE, VN30 and HNX30
- Stock Board shown on the CP code on the main trading floor by investors choose their own options.
- Real-time graph of VN-Index and HNX-INDEX

With the launch of the new Stock Board, SSI hopes to bring to investors the most effective tool in trading.
