INDEPENDENT AUDITORS' REPORT

**To: The Shareholders of
SSI Securities Corporation**

We have audited the accompanying financial safety ratio report of SSI Securities Corporation ("the Company") as at 31 December 2025 as prepared on 26 March 2026 and set out on pages 6 to 38. The report has been prepared by the Company's Management in accordance with the regulations under Circular No. 91/2020/TT-BTC dated 13 November 2020 issued by the Ministry of Finance on financial safety ratio and remedies applicable to securities companies that fail to meet the stipulated financial safety ratio ("Circular 91"), Circular No. 102/2025/TT-BTC dated 29 October 2025 issued by the Ministry of Finance ("Circular 102") amending and supplementing Circular 91 and *Note 2.1* to the financial safety ratio report.

Management's responsibility

The Company's Management is responsible for the preparation and presentation of the financial safety ratio report in accordance with Circular 91, Circular 102 and *Note 2.1* of the accompanying financial safety ratio report. The Management is also responsible for such internal control as the Management determines is necessary to enable the preparation and presentation of the financial safety ratio report that are free from material misstatement, whether due to fraud or error.

Auditors' responsibility

Our responsibility is to express an opinion on these financial safety ratio report based on our audit. We conducted our audit in accordance with Vietnamese Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial safety ratio report is free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial safety ratio report. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial safety ratio report, whether due to fraud or error. In making those risk assessments, the auditors consider internal control relevant to the Company's preparation and fair presentation of the financial safety ratio report in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. An audit also includes evaluating the appropriateness of policies used as well as evaluating the overall presentation of the financial safety ratio report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial safety ratio report as at 31 December 2025 is prepared and presented, in all material respects, in accordance with the regulations under Circular 91, Circular 102 and *Note 2.1* to the financial safety ratio report.

Shape the future
with confidence

Basis of preparation

Without modifying our opinion, we draw attention to *Note 2.1* and *Note 3* of the financial safety ratio report, which describes the applicable regulations and policies to preparation of the financial safety ratio report. Also as described in *Note 2.2*, the financial safety ratio report is prepared to comply with the regulations on preparation and disclosure of the financial safety ratio report. As a result, this report may not be suitable for other purposes.

SSI Securities Corporation

NOTES TO THE FINANCIAL SAFETY RATIO REPORT (continued)
as at 31 December 2025

3. SUMMARY OF SIGNIFICANT POLICIES FOR THE PREPARATION OF FINANCIAL SAFETY RATIO REPORT

3.1 *Liquid capital ratio*

Liquid capital ratio of the Company is determined using the formula specified in accordance with Circular 91, amended and supplemented by Circular 102 as follows:

$$\text{Liquid Capital ratio} = \frac{\text{Liquid Capital} \times 100\%}{\text{Total exposures to risks}}$$

Where, total exposures to risks are the sum of exposures to market risk, settlement risk, and operational risk.

3.2 *Liquid capital*

In accordance with Circular 91, amended and supplemented by Circular 102, the Company's liquid capital is the total equity that can be converted into cash within ninety (90) days, details as follows:

- ▶ Owners' equity, excluded redeemable preferred shares (if any);
- ▶ Share premium, excluded redeemable preferred shares (if any);
- ▶ Convertible bonds – Equity component (applicable to securities company that is convertible bonds issuer);
- ▶ Other owners' equity;
- ▶ Differences from revaluation of assets at fair value;
- ▶ Foreign exchange rate differences;
- ▶ Charter capital supplementary reserve;
- ▶ Operational risk and financial reserve;
- ▶ Other reserves in owners' equity in accordance with prevailing regulations;
- ▶ Undistributed retained earnings excluding the values specified in Clause 3 Article 5 and Clause 1 Article 7 of Circular 91;
- ▶ Balance of provision for impairment of assets;
- ▶ Fifty percent (50%) of the increase in value of revaluated fixed assets in accordance with prevailing regulations (in case of upward revaluation), or deduction for the total decrease in value (in case of downward revaluation);
- ▶ Decreases in liquid capital (*Note 3.2.1*);
- ▶ Increases in liquid capital (*Note 3.2.2*); and
- ▶ Other capital (if any).

3.2.1 *Decreases in liquid capital*

The Company's liquid capital decreases due to the following items:

- ▶ Treasury shares (if any);
- ▶ Total decrease in the value of financial assets recognised at cost equivalent to the difference between market value and carrying value of the assets, excluding securities issued by the Company's related parties as well as restricted securities with the remaining restriction period of more than ninety (90) days as from the date of financial safety ratio report;

SSI Securities Corporation

NOTES TO THE FINANCIAL SAFETY RATIO REPORT (continued)
as at 31 December 2025

3. SUMMARY OF SIGNIFICANT POLICIES FOR THE PREPARATION OF FINANCIAL SAFETY RATIO REPORT (continued)

3.2 *Liquid Capital* (continued)

3.2.1 *Decreases in liquid capital* (continued)

- ▶ The margin value, in case the Company places collateral assets to the banks for banks' underwriting upon the Company's issuance of covered warrant, is determined as the minimal value of the followings: the value of banks' underwriting and the value of collateral assets (determined as Volume of assets * Asset price * (1 – Market risk coefficient));
- ▶ The value of the Company's assets used as collateral to secure the obligations of the Company and those of other organizations or individuals with a remaining term of more than ninety (90) days (equivalent to volume of assets * asset price * (1 - Market risk coefficient)). In case where the collateral is used to secure multiple obligations of the Company, the deduction shall be allocated proportionately to each obligation of the Company (Remaining value of the obligation/collateral value);
- ▶ Short-term assets include prepayments, receivables and advances with the remaining terms of more than ninety (90) days, and other short-term assets;
- ▶ Long-term assets;
- ▶ The amounts mentioned in qualified opinion, adverse opinion or disclaimer of opinion on the audited and reviewed financial statements (if any);
- ▶ Securities issued by the Company's related parties in the following cases:
 - The parent company and subsidiaries of the Company;
 - Subsidiaries of the Company's parent company;
- ▶ Restricted securities with the remaining restriction period of more than 90 days as from the date of calculation;
- ▶ Irrecoverable items from other partners which are assessed as completely insolvent are determined at the contract value.

When determining the decrease in liquid capital, the Company may make the following adjustment to the decrease value:

- ▶ For assets used as collaterals for obligations with other entities and individuals, the decrease value shall be deducted by the minimal value of the followings: Market value of the assets, Book value, and Residual value of the obligation;
- ▶ For assets secured by other entities and individuals' assets, the decrease value shall be deducted by the minimal value of the followings: Value of the collaterals and Book value.

Accordingly, value of the collateral used in calculating the deduction from the decrease in liquid capital is determined as: Volume of the asset * Asset price * (1 – Market risk coefficient) in accordance with Circular 91.

The decrease in liquid capital of the items in current and non-current assets does not include the following items:

- ▶ Assets exposed to market risk in accordance with Circular 91, amended and supplemented by Circular 102, except for securities issued by a subsidiary, parent company or subsidiary of the Company's parent company, or restricted securities with the remaining restriction period of more than ninety (90) days as from the date of calculation;
- ▶ Contracts and transactions exposed to liquidity risk in accordance with Circular 91, amended and supplemented by Circular 102;
- ▶ Provisions for impairment of assets;
- ▶ Provision for bad debts.

The Company does not calculate exposures to risk for items deducted from the liquid capital.

SSI Securities Corporation

NOTES TO THE FINANCIAL SAFETY RATIO REPORT (continued)
as at 31 December 2025

3. SUMMARY OF SIGNIFICANT POLICIES FOR THE PREPARATION OF FINANCIAL SAFETY RATIO REPORT (continued)

3.2 *Liquid Capital* (continued)

3.2.2 *Increases in liquid capital*

The Company's liquid capital increases due to the following items:

- ▶ Total increase in value of investments, financial assets recognised at cost equivalent to the difference between market value and carrying value of the assets, excluding securities issued by the Company's related parties as well as restricted securities with the remaining restriction period of more than ninety (90) days as from the date of financial safety ratio report; and
- ▶ Debts that are convertible to equity, including: convertible bonds, redeemable preference shares and other debt instruments registered to supplement liquid capital with the State Securities Commission and satisfying all conditions stated in Clause 2, Article 7 of Circular 91 amended and supplemented by Article 4, Circular 102.

The maximum value of total debt items used to supplement liquid capital is 50% of the Company's owners' equity. Regarding convertible debts and debts registered to supplement the Company's liquid capital with the State Securities Committee, the Company deducts 20% of original value each year during the last five (05) years prior to maturity/conversion into common shares and deducts 25% of residual value quarterly during the last four (04) quarters prior to maturity/conversion into common shares.

3.3 *Exposures to market risk*

Exposures to market risk are the potential losses which may occur when the market value of the Company's assets owned and to be owned by the Company in accordance with underwriting fluctuates in a negative trend. Exposures to market risk are determined for the Company's assets, stated in Clause 2, Article 9 of Circular 91, including cash and cash equivalent, money market instruments, bonds, shares, and funds/shares of securities investment companies; and are determined by the Company at the end of the transaction day using the following formula:

Exposures to market risk = Net position x Asset price x Market risk coefficient

In particular, net position is the net volume of securities held by the Company at the reporting date, after being deducted by the number of securities lent and increased by the number of securities borrowed in accordance with prevailing regulations.

Exposures to market risk of securities that are not yet fully distributed from underwriting contracts in form of firm commitment, covered warrant issued by the Company and future contracts are determined using the formula demonstrated in *Note 3.3.2*.

Assets which are excluded when determining exposures to market risk include:

- ▶ Treasury shares;
- ▶ Securities issued by the Company's related parties in the following cases:
 - The parent company, subsidiaries of the Company;
 - Subsidiaries of the Company's parent company.
- ▶ Restricted Securities with the remaining restriction period of more than ninety (90) days as from the date of calculation;
- ▶ Bonds, debt instruments, and valuable papers in the money market which have matured;
- ▶ Securities which have been hedged by put warrants or futures contracts; put warrants and put options which have been used to hedge for underlying securities.

SSI Securities Corporation

NOTES TO THE FINANCIAL SAFETY RATIO REPORT (continued)
as at 31 December 2025

3. SUMMARY OF SIGNIFICANT POLICIES FOR THE PREPARATION OF FINANCIAL SAFETY RATIO REPORT (continued)

3.3 Exposures to market risk (continued)

3.3.1 Market risk coefficient

Market risk coefficient is determined for each account of assets as specified in Appendix I of Circular 102.

3.3.2 Asset price

a. Cash and cash equivalents, monetary market instruments

Value of cash in VND is the cash balance at the date of calculation. Value of cash in foreign currencies is the equivalent in VND using the exchange rate published by credit institutions which are allowed to conduct foreign currencies trading at the date of calculation.

Value of term deposits, cash equivalents and money market instruments is the amount deposited or purchase price plus accrued interest using the effective interest rate which has not been settled as at the date of calculation.

b. Bonds

Value of listed bonds is the average price at the most recent trading day plus accrued interest from the latest coupon payment date to the trading date (if the average price does not include accrued interest). In case there is no transaction for such bonds for more than fifteen (15) days up to the calculation date or have been delisted, the value of listed bonds is the highest of the following values included accrued interest: The price of the nearest valuation period but not exceeding ninety (90) days before the valuation date; Acquisition cost; Par value and Price determined by the internal valuation methods of the Company.

Value of unlisted bonds is the average price of the bond quoted on the trading system of the Stock Exchange at the most recent trading date plus accrued interest from the latest coupon payment date to the trading date (if the average price does not include accrued interest). In case the bonds are not traded on the centralized trading system of the Stock Exchange, or have no transaction for more than fifteen (15) days up to the calculation date, or have been deregistered from trading, its value shall be the highest among of the following values included accrued interest: The price of the nearest valuation period but not exceeding ninety (90) days before the valuation date; Acquisition cost; Par value and Price determined by the internal valuation methods of the Company (if any).

c. Shares

Value of listed shares is determined based on the closing prices (or equivalent term under the Exchange's Regulations) of the latest trading day prior to the date of calculation on the Stock Exchange.

Value of unlisted shares which have been registered on the unlisted public companies market (UPCoM) is the reference prices (or equivalent term under the Exchange's Regulations) of the latest trading day prior to the date of calculation.

In case there is no transaction of the shares listed or registered on UPCoM during more than fifteen (15) days to the date of calculation, or shares have been delisted, deregistered from trading, value of these shares is the highest of the following values: Book value; Acquisition cost; and Price determined by internal valuation methods of the Company.

Value of shares which are suspended from trading, delisted or deregistered from trading is the highest of the following values: The price of the nearest valuation period but not exceeding ninety (90) days before the valuation date; Book value, Par value, Price determined by internal valuation methods of the Company.

d. Other Securities

The value of covered warrants issued by other securities trading organizations is the closing price at the latest trading day prior to the date of calculation (if the covered warrant is listed); or the value of the covered warrant is the purchase price (if the covered warrant is unlisted).

Value of shares which are registered or custodied but has not been listed or registered for trading is the average price of quotations from at least three (03) securities companies which are not related to the Company on the latest trading day prior to the date of calculation. If there are no sufficient quotation from at least three (03) securities companies, the value of shares is the highest of the following values: Quoted price; Value determined in the latest reporting period; Book value; Purchase price; Price determined by internal valuation methods of the Company.

Value of shares of organizations under dissolution, or in bankruptcy is 80% of the liquidated value of such shares at the date of preparation of the latest balance sheet, or price determined by internal valuation methods of the Company.

The value of other shares or capital contributions is the maximum of the following values: Book value; Purchase price/Value of capital contribution; Price determined by internal valuation methods of the Company.

e. Securities investment fund certificates/Shares of securities investment companies

The value of listed public investment fund certificates or shares of a public securities investment company is determined based on the closing price (or equivalent term under the Exchange's Regulations) of the latest trading day prior to the date of calculation. In cases where there have been no transactions for more than fifteen (15) days prior to the valuation date, or where the listing has been withdrawn due to a transfer between Stock Exchanges, the value of such listed public investment fund certificates or shares of a public securities investment company is the highest of the following values: (i) the net asset value per fund certificate/share as publicly disclosed in accordance with regulations at the most recent date prior to the valuation date; (ii) the acquisition price; and (iii) the value determined by internal valuation methods of the Company.

Value of member fund or shares of private securities investment companies is equal to the net asset value per capital contribution unit/share as at the most recent reporting period or valuation period prior to the valuation date.

Value of unlisted public fund certificates is the net asset value per fund certificate as publicly disclosed in accordance with prevailing regulations at the most recent date prior to the valuation date.

Value of other funds/shares is price determined by the internal methods of the Company.

f. Undistributed securities from underwriting contracts in form of firm commitment

- ▶ Exposures to market risk of these securities are determined as the following formula:

$$\begin{aligned} & \text{Exposures to market risk} \\ & = \{ \text{Volume of remaining undistributed securities, or distributed but not yet paid} \\ & \quad \times \text{Underwriting price} - \text{Value of collaterals (if any)} \} \times \text{Issuance risk coefficient} \\ & \quad \times \left\{ \text{Market risk coefficient} + \frac{(\text{Underwriting price} - \text{Trading price}) \text{ (if positive)}}{\text{Underwriting price}} \right\} \end{aligned}$$

In case of Initial Public Offering (IPO), including initial equitisation auction and bonds auction, trading price is equal to book value per share of the issuer at the latest period, or initial price (if unable to determine book value), or par value (in case of bonds).

- ▶ Market risk coefficient is determined in *Note 3.3.1*
- ▶ Underwriting risk coefficient is determined based on the remainder of the distribution period, including its ending day under the contract, which must not exceed the distribution deadline prescribed by law. To be specific:
 - If the remainder of the distribution period, including its ending day, is more than sixty (60) days: the underwriting risk coefficient is 20%;
 - If the remainder of the distribution period, including its ending day, is between thirty (30) and sixty (60) days: the underwriting risk coefficient is 40%;
 - If the remainder of the distribution period, including its ending day, is less than thirty (30) days: the underwriting risk coefficient is 60%;
 - During the period from the ending day of the distribution to the settlement day to the issuing organization: the underwriting risk coefficient is 80%;
 - After the last settlement day, the Company has to determine the exposures to market risk of securities that have not been fully distributed using the formula in *Note 3.3* in accordance with regulations stated in Clause 4 Article 9 - Circular 91;
 - Value of customers' collaterals is determined as follows:
Value of collaterals = Volume of assets x Asset price x (1 – Market risk coefficient).

g. Covered warrants issued by the Company

Exposures to market risk of covered warrants issued by the Company, in case of in-the-money, are determined by the following formula:

$$\text{Value at risk} = \text{Max} \{((P_0 \times Q_0/k - P_1 \times Q_1) \times r - MD), 0\}$$

In which:

P₀: average closing price of underlying securities in 05 trading days before the date of calculation;

Q₀: the volume of outstanding covered warrants of a securities-trading organization;

k: conversion ratio;

P₁: price of the underlying securities determined as prescribed in the Appendix II of Circular 102;

Q₁: the volume of the underlying securities used by a securities-trading organization as guarantee of the obligation to make payment for the covered warrants issued by such trader;

r: the market risk coefficient of the covered warrants determined as prescribed in Appendix I of Circular 102;

MD: the margin deposit in case the securities companies issues the covered warrants.

- ▶ The underlying securities in the above formula must satisfy the following conditions: being included in the issuance plan or registered with the State Securities Commission on the use of these securities to hedge against risks of the covered warrants; and being the underlying securities of the covered warrants;
- ▶ In case the covered warrant issued by an unprofitable issuers, the Company shall calculate exposures to market risk of underlying securities from the hedging activities instead of calculate exposures to market risk of the covered warrants;
- ▶ The Company also calculates market risk of the positive difference between the value of underlying securities used to hedge against risk of the covered warrants and the value of underlying securities required to hedge for the covered warrants (corresponding to hedging value).

h. Futures contract

Exposures to market risk of futures contracts are determined by the following formula:

Exposures to market risk = $\text{Max} \{((\text{Settlement value at the end of the day} - \text{Value of purchased securities}) \times \text{Market risk coefficient of futures contract} - \text{Margin value}), 0\}$

In which:

- ▶ Settlement value at the end of the day = Price at the end of the day x Open volume;
- ▶ Value of purchased securities is the value of underlying securities purchased by the Company to guarantee the obligation to settle the futures contract;
- ▶ Margin value is the value of assets that the Company deposits for investment, proprietary trading and market making transactions related to futures contracts.

3.3.3 Increase in exposures to market risk

Exposures to market risk of assets are raised in case that the Company over-invests in these assets, except for securities issued under firm commitment underwriting contracts, Government bonds and bonds guaranteed by the Government. The exposures to market risk will be adjusted in accordance with following principles:

- ▶ An increase of 10% if the total value of investment in securities, contributed capital of an organization accounts for more than 10% to 15% of the owners' equity of the Company;
- ▶ An increase of 20% if the total value of investment in securities, contributed capital of an organization accounts for more than 15% to 25% of the owners' equity of the Company;
- ▶ An increase of 30% if the total value of investment in securities, contributed capital of an organization accounts for more than 25% of the owners' equity of the Company.

Dividends, coupons, preference right of shares (if any) or interest of deposits, cash equivalents, negotiable instruments and valuable papers shall be added to the value of assets to determine the exposures to market risk.

3.4 Exposures to settlement risk

Exposures to settlement risk are the potential losses which may occur when a partner fails to fulfill its settlement obligation or transfer assets on time as committed. Exposures to settlement risk are determined at the end of the contract date or transaction date as follows:

- ▶ For term deposits at credit institutions: certificates of deposit issued by credit institutions; securities borrowing or loan contracts in accordance with prevailing regulations; repurchase agreements and reversed repurchase agreements in accordance with prevailing regulations; margin loan contracts in accordance with prevailing regulations; receivables from customers in securities trading activities in accordance with prevailing regulations; other receivables from securities trading activities, exposures to settlement risk before the date of securities transfer, cash settlement and contract liquidation shall be determined using the following formula:

Exposures to settlement risk = Value of assets exposed to settlement risk x Settlement risk coefficient of partners;

3.4 *Exposures to settlement risk* (continued)

- ▶ For underwriting contracts in the form of firm commitment signed with other organizations in a syndicated underwriting contract in which the Company is the lead underwriter, the exposures to settlement risk value equals 30% of the remaining value of unpaid underwriting contracts;
- ▶ For receivables from matured bonds, valuable papers, matured debt instruments for which payment has not been made, other overdue receivables and assets, securities which have not been transferred on time, including securities and cash which have not been received from term deposits at credit institutions; certificates of deposit issued by credit institutions; securities borrowing or loan contracts in accordance with prevailing regulations; repurchase and reverse repurchase agreements in accordance with prevailing regulations; matured margin loans in accordance with prevailing regulations; receivables from customers in securities trading activities in accordance with prevailing regulations, exposures to settlement risk are determined as follows:

Exposures to settlement risk = Value of assets potentially exposed to settlement risk x Settlement risk coefficient by period

- ▶ For contracts, transactions, capital utilizations, repurchase or resale agreements of securities, or other similar agreements not included in the above-mentioned contracts and transactions, receivables from debt trading with trading partners other than Vietnam Asset Management Company for credit institutions ("VAMC"), Vietnam Debt and Asset Trading Company Limited ("DATC"), exposures to settlement risk are determined as follows:
 - Deposit agreements or agreements for purchasing real estate, and economic agreements of similar nature: Exposures to settlement risk = Deposit amount × 150%;
 - Loans or receivables from customers: Exposures to settlement risk = Loan or receivable amount × 150%;
 - Other contracts or transactions: Exposures to settlement risk = Total value of assets potentially exposed to payment risk × 100%.
- ▶ For advances with remaining recovery period of less than ninety (90) days (excluding extended advances) are determined as follows:
 - (i) In case of accounting for from 0% to 2% of owner's equity at date of calculation: Exposures to settlement risk = Total value of assets potentially exposed to settlement risk x 8%;
 - (ii) In case of accounting for more than 2% to under 5% of owner's equity at date of calculation: Exposures to settlement risk = Total value of assets potentially exposed to settlement risk x 50%
 - (iii) In case of accounting for more than 5% of owner's equity at date of calculation: Exposures to settlement risk = Total value of assets potentially exposed to settlement risk x 100%.

3.4.1 Settlement risk coefficient

Settlement risk coefficient is determined based on the type of partners and the period as specified in Appendix III, Circular 91.

3.4.2 Value of assets exposed to settlement risk

a. *Securities lending, securities borrowing, margin contracts, repurchase and reverse repurchase agreements*

Value of assets exposed to settlement risk is the market value of the contract determined as follows:

- ▶ Exposures to settlement risk are determined as follows:

No.	Type of transaction	Value of assets exposed to settlement risk
1.	Term deposits, certificates of deposit, unsecured loans; contracts, transactions, capital uses according to Point k, Clause 1, Article 10 of Circular 91, amended and supplemented by Clause 1, Article 7 Circular 102	Total balance of deposit account, certificate of deposit, loan value, contract value, transaction value plus dividends, bond interests, preference value (for securities) or deposits interests, loan interests, other surcharges (for credit)
2.	Securities lending	Max {(Market value of the contract – Collateral value (if any)), 0}
3.	Securities borrowing	Max {(Collateral value – Market value of the contract), 0}
4.	Reverse repurchase agreements	Max {(Contract value based on purchase price – Market value of the contract x (1 - Market risk coefficient)), 0}
5.	Repurchase agreements	Max {(Market value of the contract x (1 - Market risk coefficient) - Contract value based on selling price), 0}
6.	Margin contracts (loans to customers to purchase securities)/other economic agreements with the similar nature	Max {(Margin balance - Collateral value), 0}

Margin balance includes outstanding loan principal, interest and other fees.

Customers' collateral value is determined in line with *Note 3.4.3*. In case the value of collaterals does not have any reference in the market, their value is determined by the internal methods of the Company.

Asset price is determined in line with *Note 3.3.2*.
